

Acute Dialysis Catheters And KITS 急性透析导管及套件

急性单腔导管包组件包括:

1x 带导管夹和肝素帽的导管 / 1x 18G 穿刺针 / 1x "J" 形导丝直径为0.035英寸 / 1x 22G 注射针 / 1x 8Fr 扩张管 / 2x 注射器 / 1x 手术刀 / 5x 纱布 / 1x 透明敷料 / 1x 中单

Acute SINGLE lumen catheter with KIT contains

1x polyurethane catheter with clamps and injection caps / 1x 18G introducer needle / 1x "J" guidewire 0.035" / 1x 22G needle / 1x 8 Fr dilator / 2x syringe / 1x scalpel / 5x gauzes / 1 wound dressing/sterile field

急性双腔导管包组件包括:

1x 带导管夹和肝素帽的导管 / 1x 18G 穿刺针 / 1x "J" 形导丝直径为0.035英寸 / 1x 22G 注射针 / 1x 12Fr 扩张管 / 2x 注射器 / 1x 手术刀 / 5x 纱布 / 1x 透明敷料 / 1x 中单

Acute DUAL lumen catheter with KIT contains

1x polyurethane catheter with clamps and injection caps / 1x 18G introducer needle / 1x "J" guidewire 0.035" / 1x 22G needle / 1x 12 Fr dilator / 2x syringe / 1x scalpel / 5x gauzes / 1 wound dressing/sterile field

急性三腔导管包组件包括:

1x 带导管夹和肝素帽的导管 / 1x 18G 穿刺针 / 1x "J" 形导丝直径为0.035英寸 / 1x 22G 注射针 / 1x 12Fr 扩张管 / 2x 注射器 / 1x 手术刀 / 5x 纱布 / 1x 透明敷料 / 1x 中单

Acute TRIPLE lumen catheter with KIT contains

1x polyurethane catheter with clamps and injection caps / 1x 18G introducer needle / 1x "J" guidewire 0.035" / 1x 22G needle / 1x 12 Fr dilator / 2x syringe / 1x scalpel / 5x gauzes / 1 wound dressing/sterile field

ISO13485:2016
Certified Quality System

具有以下特点与优势:

- **当今最先进的医用聚氨酯材料和配方**
Advanced Medical Polyurethane
 - 抗菌性, 不滋生微生物, 也不被微生物降解。
Microbial resistance: Polyurethane do not encourage microbial growth and will not be damaged by microbial attacks.
 - 亲水性, 防止血栓形成。
Hydrophilic property: Prevent thrombosis.
 - 温度敏感性, 体温下变得柔软, 减少对血管的刺激。
Thermosensitive Polyurethane: Become soft and flexible in body temperature but still provides stiffness during catheter placement.
- **软头**---将血管壁损伤和静脉炎的风险降到最低。
Soft Tip
Minimizing the risk of vessel wall trauma and phlebitis.
- **可旋转固定翼**---提供安全舒适的导管固定方式。
Rotatable Suture Wing
Provides safety and comfort external anchoring.
- **X射线不透性定位导管**---X光胸透下, 管体清晰可见, 容易定位导管。
Radiopacity for easily-position
Visualizing under chest x-ray, easy positioning control of the catheter.
- **U型外延管**---令患者感到更舒适, 而且采用柔软硅胶材质可以抗扭结, 经久耐用。
Curved Extensions
Curving of extensions for a improved comfort and patient care, using flexible silicone for kink resistant and durability.
- **易识别导管夹**---封管容量清晰可见并且用颜色识别动脉腔和静脉腔。
ID-clamps
Indicating priming volume and simplify identification of arterial and venous lumens.
- **大侧孔和双D结构**---提供更大的流速, 减少血凝的风险。
Large side holes and Double D profile
Provide greater flow rates at lower pressures and minimize risk of clotting.

- **多种解决方案供您选择, 配有单腔, 双腔和三腔各种尺寸, 长度供选择。**
Multi-configuration
Available in various Fr sizes and lengths with single, double, triple lumen.
- **多种配件可供选择**
Available lots of accessories
Eagle Flow™ are also available in clearly arranged KITS. The ready-to-therapy KITS contain all the accessories needed for catheter placement.

HIGH FLOW AT LOW PRESSURE
Eagle Flow's large-hole and double D-sharped were designed to enable a high volume exchange and deliver maximal bloodflow rates up to 400 ml/min at low venous pressures.

In-vitro measuring-conditions: HMP-2-XX-SSK (12F × 150mm), bovine blood (Hct 32 ± 5%)
